**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims:**

- 5 Claim 1 (currently amended) A plasma display panel comprising:  
a plurality of first closed rib units positioned between a front substrate  
and a rear substrate;  
a plurality of first discharge spaces defined between the front substrate,  
the rear substrate and each of the first closed rib units, each of the  
10 first discharge spaces further comprising at least one extended rib for  
defining each of the sub-pixel units in each of the first discharge  
spaces without completely separating the sub-pixel units in the  
single first discharge space; and  
a plurality of sub-pixel units, each of the first discharge spaces  
15 comprising at least two of the sub-pixel units.

- Claim 2 (original) The plasma display panel of claim 1 wherein the  
sub-pixel units comprise a plurality of red sub-pixel units, blue sub-pixel  
units, and green sub-pixel units, wherein one of the red sub-pixel units, one  
20 of the blue sub-pixel units, and one of the green sub-pixel units together  
constitute a pixel unit.

- Claim 3 (original) The plasma display panel of claim 2 wherein each of the  
sub-pixel units comprises a first electrode, a second electrode adjacent to  
25 the first electrode, and an addressing electrode opposite to the first  
electrode and the second electrode for igniting plasma in each of the  
sub-pixel units.

Appl. No. 10/708,157  
Amdt. dated April 17, 2006  
Reply to Office action of February 06, 2006

Claim 4 (original) The plasma display panel of claim 3 wherein the first electrode and the second electrode of each of the sub-pixel units comprise a first protruded portion and a second protruded portion respectively, the first protruded portion being opposite to the second protruded portion for  
5 igniting plasma in each of the sub-pixel units.

Claims 5-7 (canceled)

Claim 8 (currently amended) The plasma display panel of claim [[7]]1  
10 wherein each of the first closed rib units comprises a structure of a hexagonal ring, a quadrilateral ring, or a decagonal ring.

Claim 9 (original) The plasma display panel of claim 8 wherein the sub-pixel units of each pixel unit are arranged in a delta.  
15

Claim 10 (original) The plasma display panel of claim 8 wherein the sub-pixel units of each pixel unit are arranged in a line.

Claim 11 (previously presented) The plasma display panel of claim 1  
20 further comprising a plurality of second discharge spaces, each of which comprises one of the sub-pixel units.

Claim 12 (original) The plasma display panel of claim 11 further comprising a plurality of second closed rib units positioned between the  
25 front substrate and the rear substrate.

Claim 13 (original) The plasma display panel of claim 12 wherein each of the second discharge spaces is defined between the front substrate, the rear

Appl. No. 10/708,157

substrate, and each of the second closed rib units.

Claim 14 (original) The plasma display panel of claim 13 wherein each of  
the second closed rib units comprises a structure of a hexagonal ring or a  
5 quadrilateral ring.

Claim 15 (previously presented) The plasma display panel of claim 1  
wherein the first closed rib units are waffle-structured ribs.

10 Claim 16 (original) The plasma display panel of claim 15 wherein each of  
the first discharge spaces is defined between the front substrate, the rear  
substrate, and two adjacent waffle-structured ribs.

Claim 17 (previously presented) The plasma display panel of claim 16  
15 further comprising a plurality of second discharge spaces, each of which  
comprises only one of the sub-pixel units.

Claim 18 (previously presented) The plasma display panel of claim 17  
wherein each of the waffle-structured ribs comprises a plurality of third  
20 closed rib units that are arranged in a matrix.

Claim 19 (original) The plasma display panel of claim 18 wherein each of  
the second discharge spaces is defined between the front substrate, the rear  
substrate, and each of the third closed rib units.

25 Claim 20 (original) The plasma display panel of claim 19 wherein the  
sub-pixel units of each pixel unit are arranged in a line.
